...quality delivered

ProjectVIEW^{ERP}
Cost Monitoring Solution

DANAOS Projects

We are a Software Solutions Provider that pioneers in Digital Construction Management providing real answers to Cost and Schedule Control, Risk Management, Project Documentation, Quality, HSE.

DANAOS Projects enables construction, infrastructure and facilities management companies along with shipyards and building maintenance managers to increase efficiency by coordinating works in the office and onsite whilst enhancing administrative transparency.

Over the last 25 years, we have launched solutions across construction sites for multiple sectors that are geographically dispersed and with a varying sophistication level; from smaller construction firms and subcontractors to international construction conglomerates such as VINCI and J&P.

ProjectVIEW Ship Building Management Software

Specifically aligned to managing the full spectrum of Shipyard's operations and tailor-made to the needs of each Client, ProjectVIEW is a comprehensive Ship Building Management Software.

DANAOS Projects Mission & Vision

Mission:

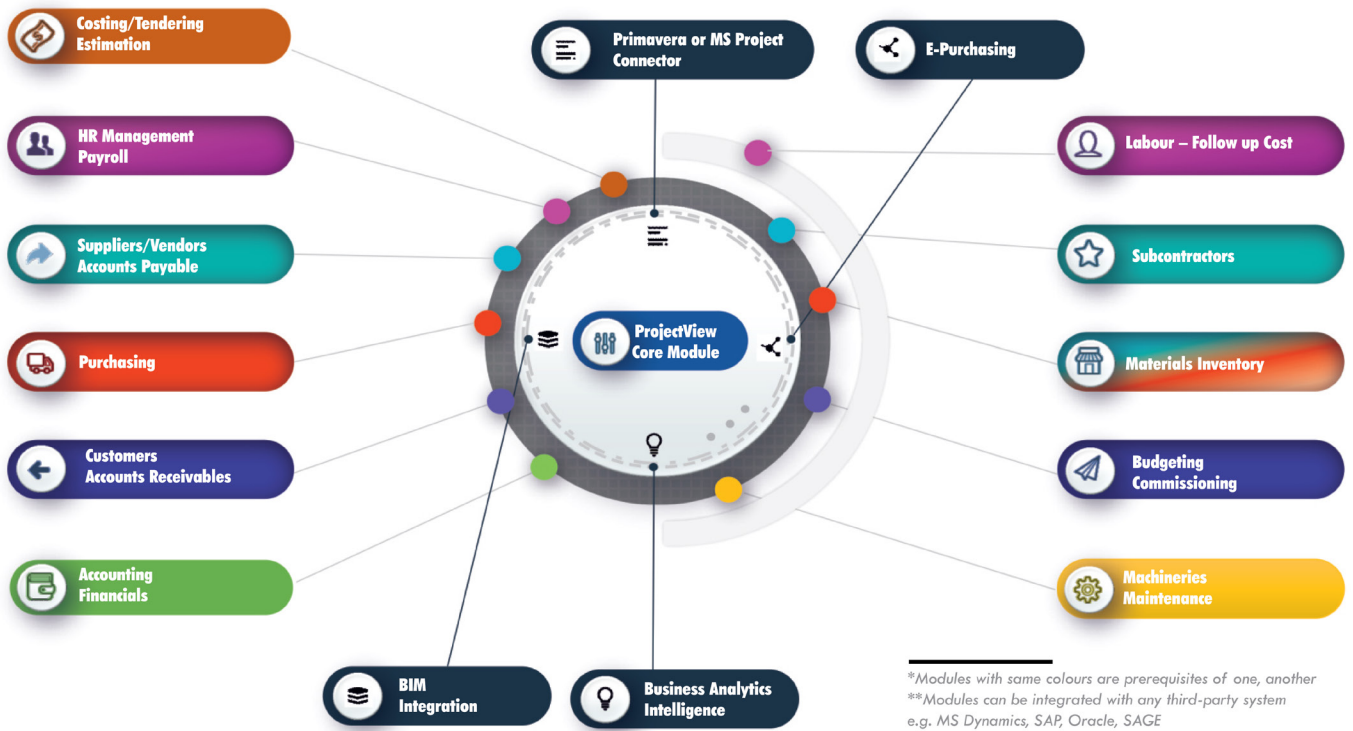

"Our Mission is to prove our clients with a total Cost Management solution that improve performance through better management of projects, processes, knowledge and people".

Mission:

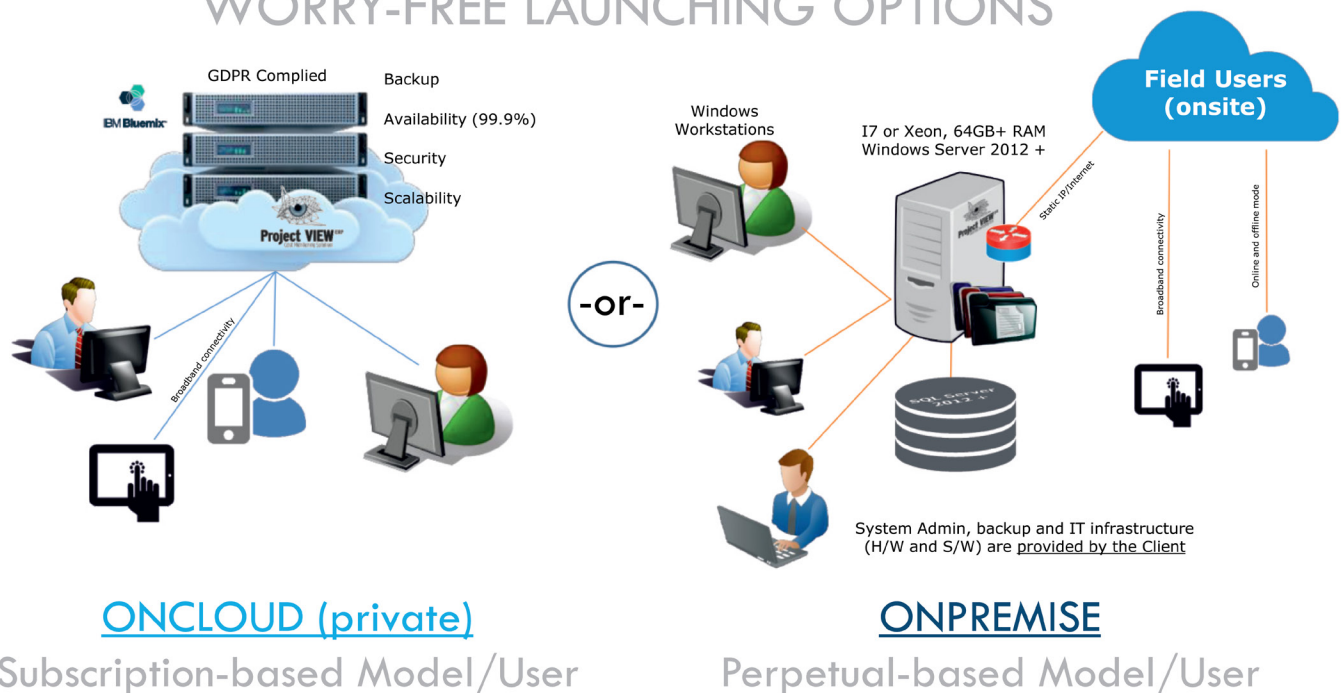

We are leading the industry by example by providing a blend of best-of-breed services and tailor made software products as Turn-Key Solutions.

Effective Interdepartmental Collaboration between workshops and Office

WORRY-FREE LAUNCHING OPTIONS

"ProjectVIEW is all about cost efficiency in ship lifecycle management, from design to building and maintenance"
